

BUBBLE MAGIC SHOW- REQUIREMENTS

These requirements are essential for the show to run safely and successfully.

SHOW OVERVIEW

The Bubble Magic Show is a 30-minute sit-down show, followed by a Kid in Bubble experience where children take turns stepping inside a giant bubble.

SETUP & SPACE REQUIREMENTS

STAGE AREA- A clear indoor stage area of **3m Wide x 2m Deep** is required. This space must remain completely clear of people at all times during setup, the show, and pack down

AUDIENCE AREA- A seated audience area is also required directly in front of the stage area. A **3m Wide x 2m Deep** is required for this space so children can sit comfortably and view the show.

'Stage' Set up

SETUP & PACK DOWN

- **30 minutes before the show** is required for setup (stage area must be clear)
- **During the show** the stage area remains clear
- **After the show** allow approximately **20-30 minutes for pack down** (stage area must be clear)

Children and guests cannot be in the stage area during setup or pack down for safety reasons.

SUPERVISION & SAFETY

The show uses floor coverings and bubble solution. The surface can be slippery and involves liquids.

To ensure the show runs safely and smoothly, children must remain in the audience area and stay behind the stage boundary during the performance.

We ask that parents and caregivers assist in supervising and reinforcing this, especially with younger children.

Parents and caregivers are required to help keep children away from the stage area during setup and pack down.

INDOOR REQUIREMENT

This show must be performed indoors, as it is an **Indoor Bubble Magic Show**, including close-up bubble magic tricks.

This type of bubble performance is highly affected by wind and outdoor conditions, so outdoor setups are not suitable.

VENUE INFORMATION

It is very helpful to receive details about the venue in advance, including the space available for the show and the type of flooring.

Photos of the space are especially useful to ensure the setup will work smoothly on the day.

AIRFLOW & ENVIRONMENT

Bubble performance is very sensitive to airflow. Air conditioning, open windows, and doors can affect how the bubbles behave.

Where possible, please:

- Keep windows and doors closed during the show
- Turn off air conditioning, or position the setup away from vents

This helps ensure the best visual effect and overall experience.

SPECIAL EFFECTS & SAFETY

This show may include a small number of special effects for visual impact, including:

- A “fog bubble” effect using a light vapour (not smoke)
- A brief, controlled flame effect (small, short burst)

The vapour used is highly unlikely to trigger smoke alarms, as it is vapour rather than fog or smoke. However, there is a very small possibility depending on the type, sensitivity, and placement of detectors.

All effects are performed safely and in a controlled manner.

It is the client’s responsibility to notify us of any venue restrictions prior to the event.
